

Installation Process

Requirements

General Requirements

- ✓ Domain
- ✓ Linux hosting
- ✓ The latest version of **self-hosted WordPress** CMS
- ✓ The latest version of **WooCommerce** plugin

WordPress Requirements

- ✓ **PHP 5.2.4** or greater
- ✓ **MySQL 5.0** or greater
- ✓ **mod_rewrite** Apache module (for permalinks)

WooCommerce Requirements

- ✓ **fsockopen** support (for payment gateway IPN access)
- ✓ (optional) An **SSL certificate** if you choose to install any direct payment gateways
- ✓ (optional) Some plugins for WooCommerce require **CURL**
- ✓ (optional) Some plugins for WooCommerce require **SOAP**

(1) Installing WordPress CMS

The screenshot shows the WordPress.org homepage. At the top, there's a navigation bar with links for Showcase, Themes, Plugins, Mobile, Support, Get Involved, About, Blog, and Hosting. To the right of the navigation is a search bar with the placeholder "Search WordPress.org" and a magnifying glass icon. Below the navigation is a large blue button labeled "Download WordPress". The main content area features a large white box with the text "Just write." and "Say hello to the beautiful, simple, full-screen editor and forget all about everything else." To the right of this box is a column of text describing WordPress as web software for creating websites or blogs, mentioning its community, thousands of plugins and themes, and over 60 million users.

WordPress is web software you can use to create a beautiful website or blog. We like to say that WordPress is both free and priceless at the same time.

The core software is built by hundreds of community volunteers, and when you're ready for more there are thousands of [plugins](#) and [themes](#) available to transform your site into almost [anything you can imagine](#). Over 60 million people have chosen WordPress to power the place on the web they call "home" — we'd love you to join the family.

Today, most of hosting companies provide **one-click-install** feature for WordPress, for example Fantastico, Softaculous, etc. Please contact your hosting for the detail.

If you want to learn more about “Installing WordPress, please visit this link.

http://codex.wordpress.org/Installing_WordPress

(2&3) Install Marketica WordPress Theme

Go to Appearance > Themes > Install Themes > **Upload**

If you download the Eventica Full Package ZIP from ThemeForest, you extract this ZIP file first, and you can find theme files under separate folders.

marketica-wp-v2.0.zip (parent theme)

marketica-wp-child-v2.0.zip (child theme)

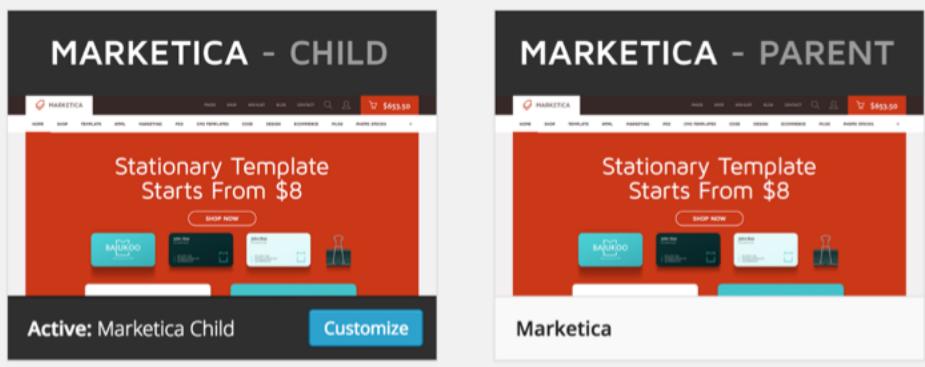

Go to **Appearance > Themes > Add New > Upload**

Upload **both** marketica-wp-v2.0.zip and marketica-wp-child-v2.0.zip

And then activate this theme Marketica Child (child theme).

If you have a theme in a .zip format, you may install it by uploading it here.

No file chosen

WHAT IS A CHILD THEME AND WHY USE IT?

Child theme builds upon an existing theme, without modifying the original theme, so that if the theme ever gets updated, your modifications to the theme are safe, because you've created a new theme and the update will only change the original files.

With a child theme, you can rebrand our theme with your own name, without modifying our theme!!!

(4) Install Required & Recommended Plugins

For first use, please install and activate all of them

Install Required Plugins

<input type="checkbox"/> Plugin	Source	Type	Status
<input type="checkbox"/> MailChimp for WordPress	WordPress Repository	Required	Not Installed
<input type="checkbox"/> Tokopress Shortcode	Pre-Packaged	Required	Not Installed
<input type="checkbox"/> Visual Composer	Pre-Packaged	Required	Not Installed
<input type="checkbox"/> WooCommerce	WordPress Repository	Required	Installed But Not Activated
<input type="checkbox"/> Regenerate Thumbnails	WordPress Repository	Recommended	Installed But Not Activated
<input type="checkbox"/> Widget Importer Exporter			
<input type="checkbox"/> WordPress Importer			
<input type="checkbox"/> Activate			
<input type="checkbox"/> Plugin	Source	Type	Status

After activating our theme, you will get a message to install required and recommended plugins. For first use, please install and activate all required and recommended plugins. Once your website is ready, you can deactivate some plugin that you do not need.

(4b) Update Permalinks

The Permalink settings can be found in your **Settings > Permalink** menu.

Do not use “default” permalink structure. `/%postname%/` is recommended.

From here you can also configure the URL structure for your shop and product pages.

- Whether to prepend shop categories/tags with shop base page (eg `yourdomain.com/shop/product` or `yourdomain.com/product`)
- The product category base slug (default is `/product-category/`)
- The product tag base slug (default is `/product-tag/`)
- Product attribute base slug will optionally use a custom base before `/attribute-name/attribute/`

Product Permalink Base

- These settings control the permalinks used for products. These settings will only apply when **not using ‘default’ permalinks** above.

Don’t forget to click **Save Changes** button.

source: <http://docs.woothemes.com/document/woocommerce/>

(4b) Setup WooCommerce Image Sizes

Go to **WooCommerce > Settings > Products** page.

On the Product Image Size, use recommended image sizes in the picture below:

Product Image Sizes

These settings affect the actual dimensions of images in your catalog – the display on [regenerate your thumbnails](#).

Catalog Images	②	600	×	420	px	<input checked="" type="checkbox"/> Hard Crop?
Single Product Image	②	1000	×	450	px	<input checked="" type="checkbox"/> Hard Crop?
Product Thumbnails	②	200	×	200	px	<input checked="" type="checkbox"/> Hard Crop?

(4c) Check WooCommerce System Status

Go to **WooCommerce > System Status** page. Review this page, if you see some notes with red text, you have to fix these to make sure your online store works properly.

Environment

Home URL:	http://tokopress-soffa.dev
Site URL:	http://tokopress-soffa.dev
WC Version:	2.1.11
WC Database Version:	2.1.11
WP Version:	3.9.1
WP Multisite Enabled:	No
Web Server Info:	Apache/2.2.14 (Win32) DAV/2 mod_ssl/2.2.14 OpenSSL/0.9.8I mod_autoindex_color PHP/5.3.1
PHP Version:	5.3.1
MySQL Version:	5.1.41
WP Memory Limit:	40 MB - We recommend setting memory to at least 64MB. See: Increasing memory allocated to PHP

(5) Import Dummy Data

We provide 3 dummy data to replicate our theme demo.

Dummy Data is useful if you want to replicate our theme demo for quick testing. We provide dummy data. You need to activate all recommended plugins before doing this process.

- 01_dummy_contents.xml
- 02_dummy_widgets.wie
- 03_dummy_revolutionslider.zip

01) IMPORTING DUMMY CONTENT

Login to your WordPress Dashboard, and go to Tools – Import page, click Wordpress, and choose the XML file above to start importing the demo data. You will need working internet connection to download the dummy images

02) IMPORTING DUMMY WIDGETS

Login to your WordPress Dashboard, and go to Tools – Widget Importer & Exporter page, click Export Widgets, and choose the WIE file above.

03) IMPORTING DUMMY REVOLUTION SLIDERS

Login to your WordPress Dashboard, and go to Revolution Slider page and then click Import Slider button.

(6a) Setup Homepage

Go to Settings > **Reading**

Reading Settings

Front page displays

- Your latest posts
 A [static page](#) (select below)

Front page: [Homepage](#)

Posts page: [Blog](#)

Blog pages show at most

9 posts

Syndication feeds show the most recent

9 items

Go to Settings – Reading page, if you want to use your custom static page for your homepage, then choose one of your page for Front page option.

**For our demo we use
“Homepage” for Front Page, and
“Blog” for Posts page**

If you want to use your Shop page for your homepage, then choose your Shop page for Front page option.

(6b) Setup Menus & Widgets

SETUP MENUS

Go to [Appearance – Menus](#) page to setup your menus.

This theme comes with 2 menu location

- Primary Menu (Header)
- Secondary Menu (Below Header)

You can create your menu and drag & drop menu elements on the left. Use **“Screen Options”** button at top right to show hide all menu elements.

The screenshot shows the 'Edit Menus' screen with two tabs: 'Edit Menus' and 'Manage Locations'. The 'Manage Locations' tab is selected. It displays a table with two rows. The first row has 'Theme Location' as 'Primary Menu' and 'Assigned Menu' as a dropdown menu with the option '— Select a Menu —'. The second row has 'Theme Location' as 'Secondary Menu' and 'Assigned Menu' as a dropdown menu with the option '— Select a Menu —'. At the bottom is a blue 'Save Changes' button.

The screenshot shows the 'Widgets' screen with four dropdown menus for widget areas: 'Main Widget', 'Footer Widget #1', 'Footer Widget #2', and 'Footer Widget #3' and 'Footer Widget #4'. Each dropdown menu has a small downward arrow icon.

SETUP WIDGETS

Go to [Appearance – Widgets](#) page to setup your widgets.

This theme comes with main widget and 4 footer widgets area.

Marker Title

On CONTACT MAP options, you can manage map marker want to show in the contact page using **Contact Page Template**.

Working With Theme Options – WooCommerce

Go to Appearance > Theme Options > Woocommerce > **WooCommerce**

Using this theme, you can work with your shop page and single product page:

- Products per page
- Products column per row
- Products sale flash
- Products title
- Products price
- Products “add to cart” button
- etc

All are done **without touching any code.**

The screenshot shows the 'Theme Options' page with the 'WooCommerce' tab selected. The interface is divided into several sections: 'Redirect URL After Customer Login' (with a text input field and a 'Save' button), 'WooCommerce - Shop Display Options' (with a dropdown menu set to 'Default Style'), 'Product Catalog Style' (with a dropdown menu set to 'Default Style'), 'Catalog Ordering' (with a checkbox labeled 'DISABLE catalog ordering dropdown' which is unchecked), 'Products Per Page' (with a text input field containing the value '15'), and 'Products Column Per Row' (with a dropdown menu currently showing the value '2').

Working With Theme Options – WooCommerce

Go to Appearance > Theme Options > Woocommerce > **WooCommerce - Related Products**

Related products are found from same product categories and product tags in random order.

Using this theme, you can hide related products, change the number of related products to show and number of columns per row **without touching any code**.

Don't forget to play with product categories and product tags to get some related products for your product.

The image displays a screenshot of the WordPress admin interface for the "WooCommerce - Related Product" settings. The title bar reads "WooCommerce - Related Product". Below it, there's a section titled "Related Products" with a checkbox labeled "DISABLE related products on single product page". Under "Number of Related Products", there is a text input field containing the number "4" and a dropdown arrow. In the background, there are two blurred images: one showing people working at a desk with laptops, and another showing a person holding a smartphone.

Working With Theme Options – WooCommerce

Go to Appearance > Theme Options > Woocommerce > **WooCommerce - Up-Sells Product**

Up-sells are products which you recommend instead of the currently viewed product, for example, products that are more profitable or better quality or more expensive. You can edit up sells when editing your products.

Using this theme, you can hide Up-Sells, change the number of Up-Sells Products to show and number of columns per row **without touching any code**.

When editing product, you can add some Up-Sells product using "**Linked Products**" settings on Product Data Tabs.

The image shows a screenshot of a WordPress theme's sidebar. On the left, there is a section titled "YOU MAY ALSO LIKE..." featuring a collection of office supplies like a stapler, pens, and business cards, with a small "Sale!" badge. On the right, a modal window titled "WooCommerce - Up-Sells Product" is open, containing settings for managing up-sells. It includes a checkbox for "DISABLE up-sells products on single product page" and a dropdown menu for "Number of Up-Sells Products" set to 4.

Working With Theme Options – WooCommerce

Go to Appearance > Theme Options > Woocommerce > **WooCommerce - Cross-Sells Product**

Cross-sells are products which you promote in the cart, based on the current product. Depending on your site's template they will display on the cart page underneath the cart products table with a thumbnail image.

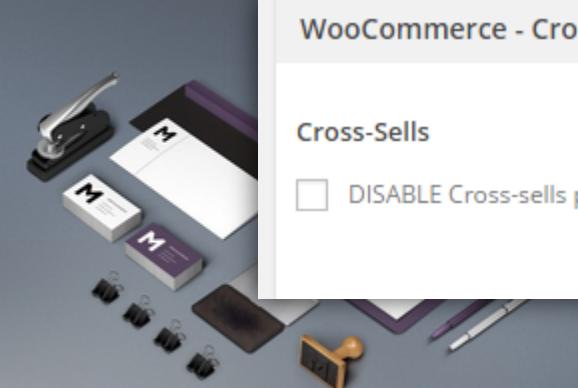

Using this theme, you can hide Up-Sells, change the number of Up-Sells Products to show and number of columns per row **without touching any code**.

When editing product, you can add some Up-Sells product using "**Linked Products**" settings on Product Data Tabs.

Theme Customizer

Working With Design Settings (Theme Customizer)

Go to Appearance > Customise

The screenshot shows the WordPress Theme Customizer interface for the Marketica theme. On the left, a sidebar lists various customizables: Site Title & Tagline, Header Image, Header Menu, and Header Background. Under Header Background, a color palette shows a gradient from purple to green, with the hex code #372926 selected. A preview window on the right shows a website header with a brick-patterned background and a main content area featuring a photo of a person in a shop with the text "Best Photo Sto Starts From S". A "SHOP NOW" button is overlaid on the image. At the bottom, a callout box states: "You can change the colors and backgrounds for most of elements in your website in "Live Preview". These colors are saved on the database".

Page Templates

Available Page Templates

We provide 4 page templates on this theme:

- **Contact:** You can use this to create Contact Us page.
- **No Title:** You can use this if you want to disable Page Title on the top of a page
- **Visual Composer:** You can use this if you want to create a full width page with Visual Composer
- **Visual Composer + No Title:** You can use this if you want to create a full width page with Visual Composer and disable Page Title. Perfect for creating Homepage.

Working With a Page Template

The screenshot shows the WordPress Backend Editor. On the left, the sidebar menu is visible with 'Pages' selected. The main area is the Backend Editor, which contains a dashed box containing the text: "Go to Pages > Add New to create new page. Choose a page template from Template select option." A red arrow points from this text box to the 'Template' dropdown in the 'Page Attributes' sidebar on the right. The 'Template' dropdown is set to 'No Title'. Other settings in the sidebar include 'Parent' (set to '(no parent)'), 'Order' (set to '0'), and a 'Publish' button.

Go to Pages > Add New to create new page.
Choose a page template from Template select option.

Tokopress Visual Composer Elements

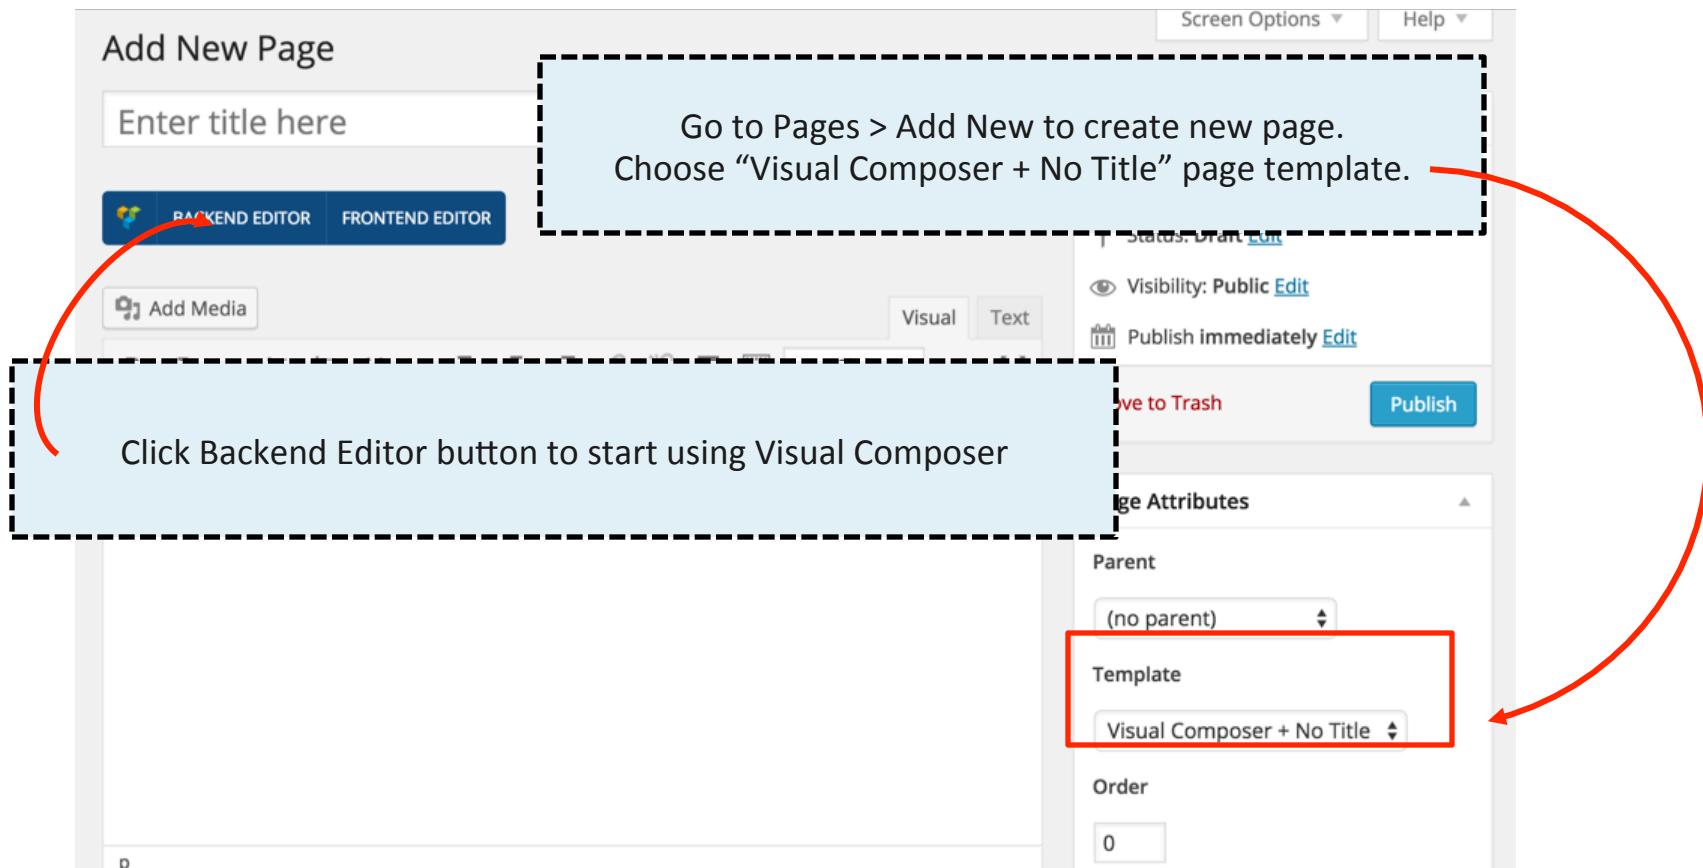

Working With Visual Composer

The screenshot shows the Marketica WordPress theme homepage. At the top, there's a navigation bar with links for PAGES, SHOP, WISHLIST, BLOG, CONTACT, a search icon, a user icon, and a shopping cart showing \$0.00. Below the navigation is a secondary menu with links for HOME, SHOP, TEMPLATE, HTML, MARKETING, PSD, CMS TEMPLATES, CODE, DESIGN, ECOMMERCE, MUSE, and PHOTO STOCKS. The main content area features a large orange background with white text: "Stationary Template Starts From \$8". Below this, there's a "SHOP NOW" button and navigation arrows. A dashed-line callout box highlights a testimonial: "Visual Composer is very unique plugin, it will help you managing your content at the WordPress site. Nowadays many websites have complex grid layouts with columns, tabs, sliders and etc. Our homepage, plan n pricing, and team members page are created using Visual Composer." At the bottom, another callout box contains the text: "For more documentation, please click i http://kb.wpbakery.com/index.php?title=Visual_Composer".

- ✓ **Skill:** skill, position or other
- ✓ **URL:** Target URL or link to other
- ✓ **Border:** border style (none, all, right, left, top, bottom, top-right, bottom-right, top-left, bottom-left, top-bottom, left-right)
- ✓ **Extra Class:** fill this field when you use addition class

The screenshot shows the Visual Composer editor interface. At the top, there's a navigation bar with tabs: Structure, New elements, WordPress Widgets, and Tokopress. Below the navigation, there's a search bar with the placeholder 'Name'. A sidebar on the left lists various element types, including 'Tokopress - Testimonial' (which is currently selected), 'Tokopress - Custom Call To Action', and others like 'WooCommerce - Products' and 'WooCommerce - Categories'. The main content area is titled 'Edit Tokopress - Testimonial'. It contains two input fields: 'Name' (with the value 'Tilvar Claudiu') and 'Avatar' (a placeholder box with a green plus sign). The 'Tokopress - Testimonial' element is also previewed in a circular thumbnail on the right side of the editor.

Visual Composer – Custom Call To Action

The screenshot shows the Visual Composer interface with a grid of elements. A specific element, 'Tokopress - Custom Call To Action', is highlighted with a circular magnifying glass. This element is enclosed in a dashed box on the left, which contains the following text:

Custom Call To Action:

- ✓ Paragraph Title
- ✓ Paragraph Title Color: custom title color
- ✓ Paragraph Text
- ✓ Paragraph Text Color: custom text color
- ✓ Paragraph Align: paragraph align (left, center, right)
- ✓ Button Text
- ✓ Button Align: button align (left, Center, Right)
- ✓ Extra Class: fill this field when you use addition class

To the right of the highlighted element is its edit panel, titled 'Edit Tokopress - Custom Call To Action'. The panel includes fields for 'Paragraph Title' (set to 'Custom Call To Action'), 'Paragraph Title Color' (with a 'Select Color' button), and 'Paragraph Text' (set to 'Custom call to action paragraph text').

Visual Composer – Team Members

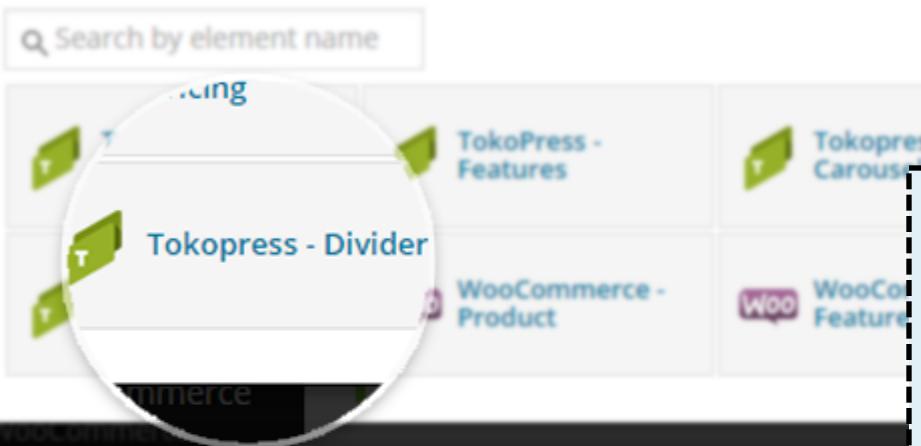

The screenshot shows the Visual Composer interface with the 'Tokopress - Team Members' element selected. The element has a dashed border around its content area. Inside this area, there is a list of features:

- Team Members:**
- ✓ Team Member Name
- ✓ Team Member Image
- ✓ Image Size: image size from avatar (Small, Medium, Large)
- ✓ Skill: skill, position or other
- ✓ Excerpt: excerpt from team member
- ✓ Link URL: target URL or link to other
- ✓ Extra Class: fill this field when you use addition class

To the right of the element, there is an 'Edit Tokopress - Team Members' modal window. It contains two fields:

- Team Members Name:** Tilvar Claudio
- Team Members Image:** A placeholder box with a green plus sign, indicating where to upload an image.

Visual Composer – Divider

The screenshot shows the Visual Composer Element Library interface. A magnifying glass highlights the 'Tokopress - Divider' element, which is the current active item. Other visible elements include 'Tokopress - Features', 'Tokopress - Image Carousel', 'Tokopress - Heading', and 'Tokopress - Text'. At the bottom left, there's a button labeled 'Edit Tokopress - Divider'.
